

Firmware Update v1.00.16 – DOWNTOWN

Release Date: 12 Oct 2026

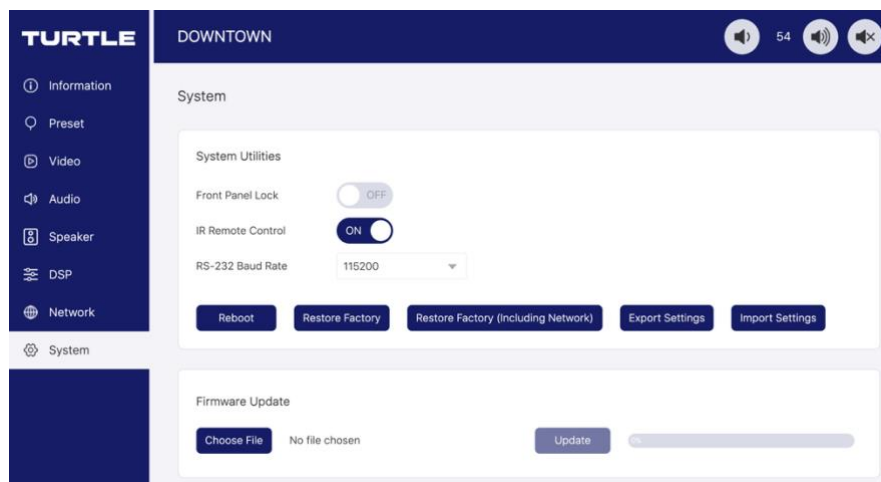

What's New

- Fixed an issue where DOWNTOWN failed to detect and play content containing very short audio tracks, including single-frame sync test files.
- Minor UI fixes.

Who Should Update

All users of Downtown are encouraged to install this update.

Installation

The firmware update package contains three files that must be installed one at a time, in the order listed below, via the DOWNTOWN WebUI.

Installation Steps

1. Access the DOWNTOWN WebUI by entering the unit's IP address in your web browser.
2. Navigate to **System → Firmware Update**.
3. Select and upload the first firmware file:
 - 1-MCU_MAIN_V1.00.16.bin
4. Allow the update to complete. **The unit will automatically reboot** after installation.
5. Once the unit has rebooted, reconnect to the WebUI and repeat the process with the second file:
 - 2-MCU_SUB_V2.00.06.bin
6. Wait for the unit to complete the update and reboot again.
7. Reconnect to the WebUI and install the final file:
 - 3-IP_MODULE_V2.00.12.bin
8. Wait for the final update to complete and the unit to reboot.

Important Notes:

- Install all three firmware files in the specified order.
- Wait for each update and reboot to complete before proceeding to the next file.
- Do not disconnect power or interrupt the update process.
- Once all three files have been installed and the final reboot is complete, the firmware update is finished.

Firmware Update v1.00.15 – DOWNTOWN

Release Date: 31.07.2026

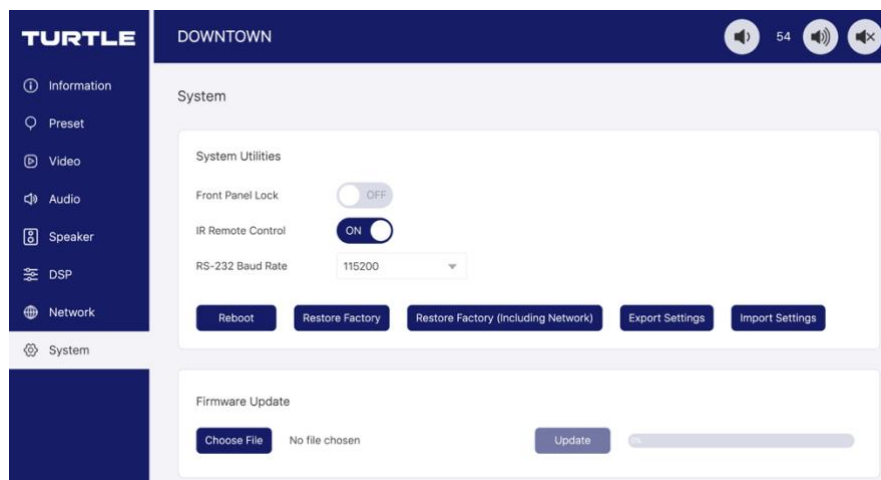

What's New

- Fixed minor bugs with the WebUI.

Who Should Update

All users of Downtown are encouraged to install this update.

Installation

Upload Controller Firmware: Click the button to upload the Downtown update firmware.

Upload Encoder or Decoder Firmware: Click the button to upload the Encoder/Decoder update firmware. After loading, you need to click “Update All” to update firmware for all Encoders/Decoders, or click “Update” to update firmware for a single Encoder/Decoder.
