

Firmware Update v1.10.09 – Mineola 8x8

Release Date: 7 Jan 2026

MCU v.1.10.09

DEP v.1.3.3.5

What's New

- Added VU Meters in the WebUI.
- Changed the output scale to dBFS.

Installation

The screenshot displays the 'System' tab of the Turtle WebUI. On the left is a dark blue sidebar with the 'TURTLE' logo and a menu containing: Information, Preset, Input, Output, DSP, Network, and System (which is highlighted). The main content area is titled 'System' and contains three sections:

- Account Passwords:** A form with two rows, 'User' and 'Admin'. Each row has three input fields: 'Old Password...', 'New Password...', and 'Confirm Password...'. Each row ends with a dark blue 'Save' button.
- System Utilities:** Contains a 'Power On' toggle switch set to 'ON', a 'Standby Mode' dropdown menu currently showing 'Standby', and an 'Auto Standby Time' slider ranging from 0 to 100 minutes, currently set at 10. Below these are four buttons: 'Reboot', 'Restore Factory Settings', 'Export Settings', and 'Import Settings'.
- Firmware Update:** Contains two rows. The first row is for 'MCU Update' with a 'Choose File' button, the text 'No file chosen', and an 'Update' button. The second row is for 'DEP SDK Update' with a 'Choose File' button, the text 'No file chosen', and an 'Update' button.

Update MCU Firmware:

Login to the WebUI, navigate to the System tab.
Click the Choose File button to upload the MCU firmware.
Click the Update button.

Update DEP SDK Firmware:

Login to the WebUI, navigate to the System tab.
Click the Choose File button to upload the DEP SDK firmware.
Click the Update button.
