

Firmware Update v1.00.15 – DOWNTOWN

Release Date: 31.07.2026

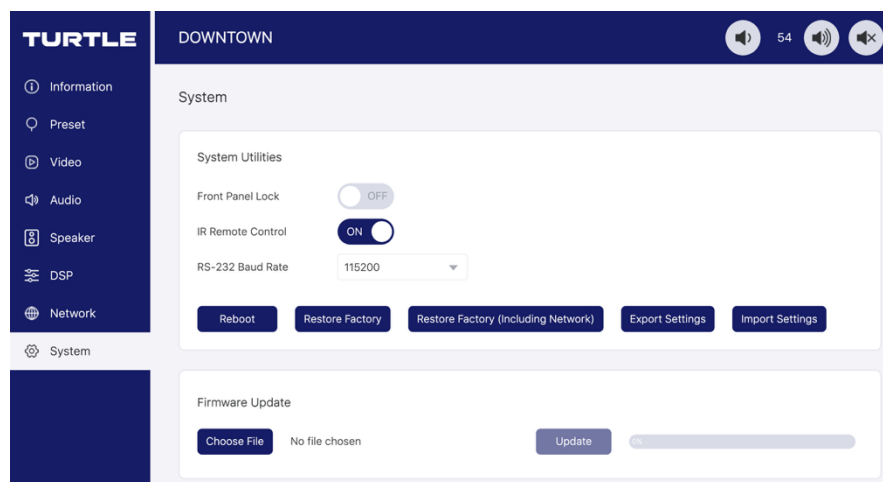

What's New

- Fixed minor bugs in the WebUI.

Who Should Update

All users of Downtown are encouraged to install this update.

Installation

Important: Install the three firmware files one by one in the order shown below. The Downtown unit will reboot automatically after each update. Wait for the unit to finish rebooting before installing the next file.

FW 1 - 1-MCU_MAINV1.00.15.bin: Upload the file, start the update, and wait for the unit to reboot completely.

FW 2 - 2-MCU_SU_V2.00.05.bin: After the first reboot is complete, upload the file, start the update, and wait for the unit to reboot completely.

FW 3 - 3-IP_MODULE_V2.00.12.bin: After the second reboot is complete, upload the file, start the update, and wait for the final reboot to complete.
